What is this Product ?

Type

This Product is a Luxembourg investment fund, Investment company with variable capital (SICAV) – Specialised Investment Fund (SIF).

Term

The lifespan of this Product is not limited.

Objectives

The Product seeks to accomplish this objective by investing, either directly or indirectly, in a diverse range of eligible investments, not restricted in accordance to geographical area or sector. The Product will primarily invest in listed equities of small, medium and large-sized companies; bonds, including, but not limited to, convertible bonds, contingent bonds, high yield bonds, ETN, fixed rate and floating securities, zero-coupon bonds and treasury bonds, with no particular rating, issued by governments, corporations and other national or supranational bodies; open-ended Investment Funds, including ETFs, and Fund of Funds; structured products, guaranteed or not; money market instruments and deposits. The investment objective of the Product is to generate superior long term capital appreciation through a portfolio having a diversified risk profile by a combination of investments in compliance with the SIF Law and the CSSF circular 07/309 on the risk diversification requirements applying to SIFs, section 8 “Investment Restrictions” and this Supplement.

Intended retail investor

The investment in the Product entails an above-average risk and is only appropriate for well-informed investors within the meaning of Article 2 of the SIF Law who are willing to invest on a long-term basis, do not require liquidity in the short-medium term from their investment and who can take the risk to lose their investment.

Practical information

Custodian: Edmond de Rothschild (Europe)

Redemptions are possible on each Valuation Day when notified to the Administrative Agent before 12.00 a.m., Luxembourg time, 3 Business Days preceding the Valuation Day; it will take 30 Business Days for the remit of redemption proceeds.

The latest version of the PRIIP KID is available on www.aygluxembourg.lu. The issue document of this Product as well as the annual report may be obtained at the registered office of the Product.

What are the risks and what could I get in return ?

Risk Indicator

← Lower risk Higher risk →

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (6 years).

The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Significant risk(s) for the Product not taken into account in this indicator include the following:

Credit risk and interest rate risk: The Product invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade. An increase in interest rates may cause the value of fixed-income securities held by the Product to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

"High yield" bonds risk: The Product will invest in sub-investment grade bonds. These bonds may produce a higher level of income than investment grade bonds but at a higher risk to your capital.

Risk linked to the use of derivative instruments: The Product may use derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore, fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument. With the use of over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Product.

Convertible Bonds: Convertible bonds are hybrid securities between debt and equity, which in principle allow holders to convert their interest in bonds into shares of the issuing company at a specified future date. Investment in convertibles will result in greater volatility than bond investments in standard bonds.

Risks linked to investment into structured products : Structured products can generally be defined as instruments created to meet specific needs of investors or borrowers that cannot be met with conventional financial instruments. These are non-standardised, and usually invest in a variety of underlying assets. Payoffs of structured products are dependent to multiple conditions and/or scenarios which are not always easy to decrypt at first sight. Their understanding require a good knowledge of financial products and markets. Frequently the investments are achieved by embedding derivative products on indices with bonds or money market instruments. Structured product employs leverage and the percentage price movements will be greater than those of the underlying asset. Whilst many structured products have a level of capital protection, not all do so.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

The recommended holding period is 6 years.		if you exit after 1 year	6 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	EUR 7,120	EUR 6,000
	Average return each year	-28.8%	-8.2%
Unfavourable scenario	What you might get back after costs	EUR 7,300	EUR 8,010
	Average return each year	-27.0%	-3.6%
Moderate scenario	What you might get back after costs	EUR 10,110	EUR 10,150
	Average return each year	1.1%	0.2%
Favourable scenario	What you might get back after costs	EUR 12,230	EUR 13,100
	Average return each year	22.3%	4.6%

This table shows the money you could get back over the recommended holding period of 6 years, under the different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario : this scenario occurred for an investment between 05/2021 and 12/2023.

Moderate scenario : this scenario occurred for an investment between 07/2014 and 07/2020.

Favourable scenario : this scenario occurred for an investment between 05/2015 and 05/2021.

What happens if A&G Luxembourg AM, S.A. is unable to pay out ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario ;
- EUR 10 000 per year is invested

Investment EUR 10,000	If you exit after 1 year	If you cash in after 6 years (recommended holding period)
Total costs	EUR 255	EUR 1,656
Annual cost impact (*)	2.6%	2.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 2.80% before costs and 0.25% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	EUR 0
Exit costs	We do not charge an exit fee for this Product (but the person selling the Product may do).	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	1.76% of the value of your investment per year. The impact of the costs that we take each year for managing this Product. This figure is based on actual costs over the past year.	EUR 176
Transaction costs	0.22% of the value of your investment per year. The impact of the costs of us buying and selling underlying investments for this Product. The actual amount will vary depending on how much we buy and sell.	EUR 22
Incidental costs taken under specific conditions		
Performance fees and carried interest	0.57% - Description: From 0% to 10% performance fee, subject to a high watermark principle	EUR 57

These tables show the impact the different costs have on the investment return you might get back at the recommended holding period and the meaning of the different cost categories.

If you invest in this Product in the context of a life insurance contract or capitalisation contract, this document does not take into account the fees relating to this contract.

How long should I hold it and can I take the money out early ?

Recommended holding period : 6 years

This Product is designed for longer term investments; you should be prepared to stay invested for at least six years. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer.

Redemptions are possible on each Valuation Day when notified to the Administrative Agent before 12.00 a.m., Luxembourg time, 3 Business Days preceding the Valuation Day; it will take 30 Business Days for the remit of redemption proceeds.
